

## **ABOUT THE PROTECTION OF THE EARTH CIVILIZATION FROM ASTEROID CRASH**

M.E. Gertsenshtein, V.V. Klavdiev, B.N. Shvilkin

*Lomonosov Moscow State University, Moscow, Russia*

**Abstract.** It is shown, that E. Teller's idea of dangerous asteroid destruction at moderate distances from the Earth can be realized with modern chemical fuel engines. The reflected sun light is employed as a sounding signal in the observation system.

**Keywords:** asteroids, engine chemical fuel, nuclear explosion, deep cosmos.
