

VERSATILE GEOPHYSICAL DATA ACQUISITION SYSTEM

I.M. Aleshin, S.S. Burguchev, F.V. Perederin, K.I. Kholodkov

Schmidt Institute of Physics of the Earth of the Russian Academy of Sciences, Moscow, Russia

Software and some hardware aspects of the universal data acquisition system developed for geomagnetic and GNSS measurements are considered. The system's design features, APIs, platform independency and energy efficient hardware are described.

Keywords: data acquisition systems, geomagnetic measurements, GNSS measurements
